Hi, Eric. This is from the TCEQ statement, which we provided input and approval for earlier this morning, but told from the EPA viewpoint. I also added a little bit from this evening's report from Matt. Let me know if you want to add anything else to it. Carmen

The U.S. Environmental Protection Agency (EPA) and Texas Commission on Environmental Quality (TCEQ) are working with Unified Command in response to an explosion at the TPC Group Plant in Port Neches, TX. EPA is monitoring with the Airborne Spectral Photometric Environmental Collection Technology aircraft (ASPECT) and has several On-Scene Coordinators and technical support personnel at the site. State and local responders are conducting handheld monitoring and collecting data downwind and in the community.
